Player Safety Recommendations

RECOMMENDED BAT STANDARDS

ISF
2005

WBSC

ASA
2000

ASA
2004

USA
SOFTBALL

USSSA

Be cautious purchasing used bats, as they may no longer meet compression standards which increases the risk of player injury.

RECOMMENDED BALLS

For Men's, Master Men's & Coed:
12" Worth Hot Dot
COR .52 275 lbs. Compression

For Women's:
11" Worth Hot Dot
COR .52 375 lbs. Compression

11" Worth Green Dot
COR .44 375 lbs. Compression

Player safety is a factor when deciding upon which ball to use. The ball's COR and compression affect the speed in which the ball comes off the bat.

OPTIONAL DEFENSIVE PLAYER EQUIPMENT

Fielder's Mask
Mouth Guard

RECOMMENDED PITCHER PROTECTION

Face mask with head protection and chin pad

Pitchers are **REQUIRED** to wear a mask that includes head protection during Canadian Championship play.

BATTER & BASE RUNNER PROTECTION

Batting Helmet

An approved batting helmet should be worn while on deck, batting and running the bases, and is **REQUIRED** during Canadian Championship play.

Coaches should also consider wearing head protection such as a batting helmet or skull cap. Base coaches should ensure they are alert and avoid distractions such as score keeping while on the playing field.

Safety Recommendations For Leagues and Tournament Coordinators

SAFE BASE

Use a double first base, or “Safe Base” to avoid collisions and help prevent player injuries.

SAFE LINE

To help avoid collisions and avoid player injury during plays at home plate a Safe Line or Scoring Line can be used.

A Safe Line is drawn in foul territory starting at the front corner of home plate and perpendicular to the third base line. It should extend a minimum of 3 feet.

Instead of needing to touch home plate, runners need to cross the Safe Line in order to score.

FIELD DIMENSIONS

Baselines are recommended to be 65 feet in length.

PITCHING RULES

Player safety is a consideration when developing pitching distance and pitching arc rules.

The pitcher's plate should be placed at a minimum **50 feet**. (measured from the back of home plate)

Allowable pitching arc should be between **6 to 12 feet**.

PITCHING SCREENS

Pitching screens are used in some leagues and tournaments. (ex: 3 pitch)

Please ensure pitching screens are being used properly to help protect pitchers.
